

# 4th Ave Mobility Improvements

## UPGRADING THE 4TH AVE PROTECTED BIKE LANE

### OVERVIEW

We're upgrading the protected bike lane on 4th Ave between Vine St and Jefferson St. We will be removing the paint and posts and installing a raised concrete island within the existing painted buffer space. We're making this change to further improve safety by creating added protection between people biking and people driving. We expect to begin construction as soon as early 2024.

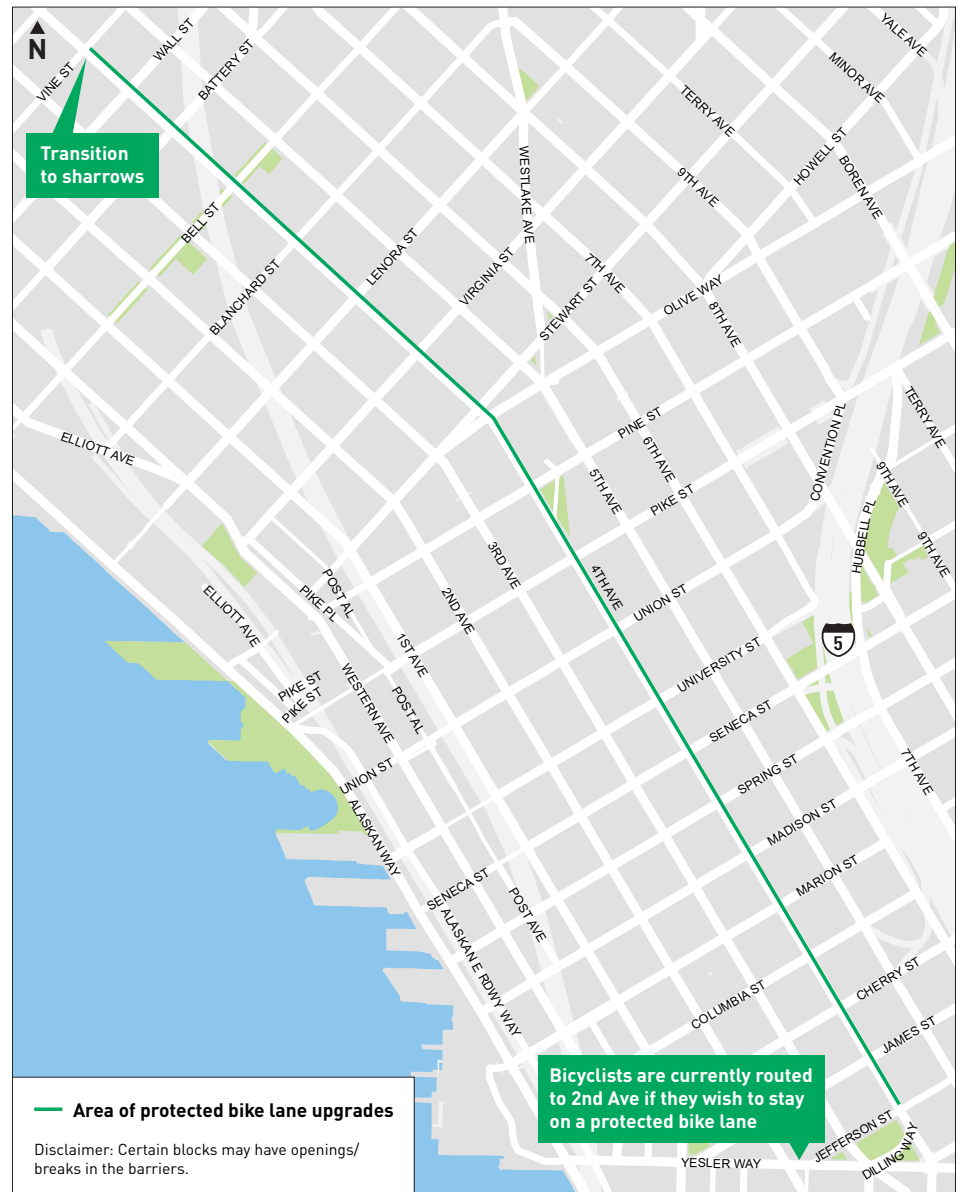

### PROJECT BENEFITS

The 4th Ave Mobility Improvements project is part of our Center City Bicycle Network initiative for parts of Seattle to become fully connected through a series of bike lanes. In 2021, we completed a two-way protected bike lane and signal upgrades from Vine St in Belltown to the 2nd Ave protected bike lane in Pioneer Square (via Dilling Way and Yesler Way). The protected bike lane and signal upgrades improve safety and mobility for all road users by separating people biking from people driving and creating separate signal phases for people walking, biking, and driving.

### FUNDING

This project is funded by the 9-year Levy to Move Seattle, approved by Seattle voters in 2015.
