WILSON AVE TRANSPORTATION IMPROVEMENTS

Paving, protected bike lanes, parking consolidation

Construction is underway on Wilson Ave S. We are currently working on curb ramps and storm drains. Following this work, we will begin concrete work including spot sidewalk rebuilds and paving the new road. The final roadway striping and channelization will happen last. Construction is expected to last through the fall.

We have heard your concerns about the new protected bike lanes and changes to the street design. Based on your feedback, we revised the design. The new design keeps the protected bike lanes and updates the parking configuration.

Please join us on Thursday, August 16 from 6PM – 8PM at the Lakewood Seward Park Community Club (4916 S Angeline St). You'll hear a presentation from the Seattle Department of Transportation and have a facilitated question and answer session with staff.

If you can't make the meeting, the updated design will be posted on the project website around the time of the meeting.
